

Transactions of the Institute of Metal Finishing

2010, Volume 88

SUBJECT INDEX

Abrasion resistance, hard anodised Al, Taber testing	21	Chromium electrodeposition, high strength steel, H ₂ embrittlement prevention, pulse plating	277	Copper electrodeposition, Cu sulphate bath, electroless Cu pre-treatment, microhole filling, PEG size effect, morphology, crystal structure	149
Adhesion scribe grid testing, electrodeposited coatings, Mg alloy substrates	75	Chromium plating, anodes, Pt-Ti, aircraft industry	17	Copper electrodeposition, pulse plating, pulse reverse plating, acid sulphate bath, throwing power, through-hole	243
Aerospace coatings	6, 8, 11, 17, 21, 35, 41, 47, 57, 179, 303	Chromium plating, ionic liquids	285	Copper electrodeposition, pyrophosphate bath, Mg alloy substrate, pre-treatment	75
Agitation, eductor, modelling, computational fluid dynamics	185	Chromium plating, Mg alloy substrate, pre-treatment	75	Copper electroless deposition, methanesulphonate bath, deposition rate, crystal structure, surface morphology, through-hole plating	215
Alkaline cleaning, phosphate conversion coatings, coating weight, surface morphology	220	Chromium-cobalt alloy electrodeposition, C(III) formate-urea bath, crystal phase structure, morphology	100	Corrosion inhibitors, nanomaterials, primers, aerospace	8
Alloy plating	28, 47, 93, 100, 158, 285, 317, 324	Cobalt plating, Co-Pt alloys, hard magnetic layers	28	Corrosion inhibitors, silanes	24
Alumina	21, 154, 266, 303	Cobalt-phosphorus alloy electrodeposits, nanocrystalline, amorphous, corrosion resistance, morphology, crystal structure	324	Corrosion resistance	6, 8, 11, 41, 47, 57, 93, 107, 163, 256, 311, 317, 324
Alumina, thin anodic layers, impurity doped, analysis, GD TOFMS	154	Cobalt-tungsten alloy plating, Co sulphate-Na tungstate bath, salt spray tests, wear testing	47	Coulometry, dual Ni layers, pulsed current electrodeposition	256
Aluminium electrodeposition, non-aqueous baths	226	Coefficient of friction, Ni-Cu alloy pulse electrodeposits, Ni-Cu/Cu pulse electrodeposited multilayers	158	Cyclic voltammetry	144, 204
Aluminium electrodeposition, non-aqueous baths, Al chloride-LiAl hydride, Na fluoride-triethyl Al/ toluene	122	Composite plating	93, 311	Editorial	1, 117, 171, 226, 279
Aluminium plating, ionic liquids	285	Conference report – 4 th European Pulse Plating Seminar	177	Eductor agitation, modelling, computational fluid dynamics	185
Aluminium	21, 122, 226, 266, 285	Conference report – Eurointerfinish 2009	24	Elastomeric polyurethane coatings, aerospace, defence	179
Aluminium, anodising, chromic acid substitute processes, aerospace, fatigue testing, fracture assessment	303	Conference report – European Parliament debate, SME sustainability	16	Electrically conductive organic coatings, aerospace, defence	179
Anodes, platinised-Ti, Cr plating, aircraft industry	17	Conference report – Future technologies, applications, opportunities	282	Electrochemical impedance spectroscopy	41, 163, 262, 311, 317
Anodic films	21, 57, 154, 266, 303	Conference report - Industry and Parliament Trust	228	Electrochemical polarisation	57
Anodising	21, 57, 154, 266, 303	Conference report – IONMET, SurfEnergy	175	Electrochemical quartz crystal microbalance gravimetry	158
Anodising, chromic acid alternatives, aerospace, fatigue, fracture assessment	303	Conference report – Surface Analysis Workshop	232	Electrodeposition	11, 17, 24, 28, 47, 75, 84, 93, 101, 107, 122, 130, 144, 158, 163, 191, 204, 209, 226, 234, 237, 243, 256, 262, 272, 277, 285, 317, 324
Anodising, hard, aerospace industry	21	Conference report – Targeted testing for cost reduction	120	Electrodeposition, ionic liquids, IONMET projects	285
Atomic absorption spectrophotometry, Cu plating bath	84	Conference report – Whiskers	81	Electrodeposition, paint, automotive body, virtual analysis, thickness	294
Atomic force microscopy	93, 215, 149, 256, 285	Conversion coating, phytic acid, Zn-Co electrodeposit, corrosion protection	163	Electroless deposition	75, 198, 215, 311
Biochemical hybrid technology, waste minimisation, paint detackification	70	Conversion coatings, Zn electrodeposits, modified molybdate, chromate substitute, morphology, corrosion resistance	107	Electropolishing, ionic liquids	285
Biography	83, 129, 178, 281	Copper electrocrystallisation, nucleation, Cu sulphate bath, additives role, SPS, PEG, cyclic voltammetry, chronoamperometry	144	Energy dispersive X-ray spectroscopy	47, 311
Book reviews 20		Copper electrodeposition, acid sulphate bath, Hull cell, current/potential distributions, cathode formats, deposit morphology/structure	84		
Bruisable coatings	179	Copper electrodeposition, acid sulphate, pulsed current plating, additives, PEG, SPS, through-hole, orthogonal experimental design	272		
Cavitation intensity, ultrasonic cleaning, aqueous alkaline solutions	166				
Chrome-free conversion coatings	24, 57, 107, 163, 282				

Epoxies, polyurethanes, high temperature resistance, aerospace	6	Nickel electrodeposition, pulsed current, dual layer, corrosion resistance, microstructure, morphology	256	Scanning electron microscopy	21, 28, 41, 47, 57, 84, 93, 100, 107, 130, 158, 163, 191, 209, 215, 220, 303, 311, 317, 324
Epoxy primer filler coating, aerospace, defence	179	Nickel electrodeposition, pulsed current, pigmentation, anodised Al, solar absorber	266	Scanning vibrating electrode technique	107
Field emission gun scanning electron microscopy, anodised Al, surface cracking	303	Nickel tertiary $Al_2O_3/Y_2O_3/CNT$ nanocomposite electrodeposition, Ni sulphate bath, morphology, corrosion resistance	93	Secondary current pulse curves, cobalt, platinum	28
Fourier transform spectroscopy, sol-gel films, Mg alloys	41	Nickel-copper nanocrystalline alloy pulse electrodeposition, sliding wear testing	158	Sheelagh Campbell, obituary	225
Glow discharge optical emission spectroscopy	277	Nickel-copper/copper multilayer pulse electrodeposition, sliding wear testing	158	Silanes	24, 57
Glow discharge optical emission spectroscopy, Mg alloy surfaces, anodising, sol-gel treatment	57	Nickel-high P-Si ₃ N ₄ electroless composite coatings, corrosion resistance, morphology	311	Silver deposit, yield strength, Young's modulus, measurement, numerical simulation	209
Glow discharge time-of-flight mass spectrometry, impurity doped anodic layers	154	Nickel-phosphorus electroless plating, Mg alloy substrate, pretreatment	75	Silver electrodeposition, Ag nitrate-KCN bath, deposit mechanical properties, structure, microindentation, modelling	209
Gold electrodeposition, KAu cyanide bath, self-assembling organics, morphology, SEM, SERS, liposomes	130	Numerical analysis, automotive body paint electrodeposition, virtual surface	294	Silver electroless deposition, ABS substrate, Co ²⁺ reducing agent, crystal structure, morphology, deposition rate	198
Hardness	35, 47, 57, 204, 285	Obituary	174, 255	Silver immersion plating, ionic liquids	285
Hothersall Memorial Lecture 2009, P. L. Cavallotti	28	Operating maps, electroplating aid, neural networks	234	Solar absorber, Ni-pigmented anodised Al	266
Hull cell cathodes, planar carbon, segmented carbon planar, single reticulated vitreous carbon (RVC), segmented RVC	84	Optical microscopy	272	Sol-gel film composite, La salts, silica, Mg alloy	41
Hull cell, Cu electrodeposition, cathode shapes, current/potential distributions	84	Organic coatings	6, 70, 179	Statistical experimental design	93, 272
Hydrogen embrittlement, prevention, pulse plating	277	Organic engineered coatings, composite/polymer substrates, aerospace, defence	179	Structure, Ag electroless deposit, XRD	198
IMF President report	231	Orthogonal experimental design, Cu plating, pulsed current	272	Structure, Co-W alloy deposit	47
Intumescent/thermal barrier coatings, aerospace, defence	179	Paint detackification, biochemical hybrid technology, waste minimisation	70	Structure, Cu electrodeposit	84
Ionic liquids electrodeposition, IONMET projects	285	Phytic acid, conversion coating, Zn-Co electrodeposits, corrosion protection	163	Structure, Cu electroless deposit, XRD	215
IONMET projects results	285	Pigmentation, pulse electrodeposited Ni, anodised Al, solar absorber	266	Structure, Ni electrodeposit, XRD	191
Iridium electrodeposition, Na hexabromoiodate bath, crack formation, surface roughness, ultrasound intensity, hardness, surface profilometry	204	Platinum plating	11, 28, 35	Sum frequency generation spectroscopy, Au electrodeposition, SAMs, liposomes	130
Laser profilometry, wear tests, Mg alloy, anodised, sol-gel treatment	57	Platinum plating, Co-Pt alloys, hard magnetic layers, tungstate addition	28	Surface enhanced Raman spectroscopy (in-situ), Au electrodeposition, SAMs, liposomes	130
Letter to editor	174, 226	Platinum plating, turbine blades, Pt-alumina composites, hot corrosion resistance	11	Surface morphology	21, 28, 41, 47, 57, 84, 100, 107, 130, 149, 158, 163, 191, 198, 209, 215, 220, 256, 285, 303, 311, 324
Linear polarisation resistance	107	Polarisation curves, electrodeposition, Mg alloy substrates	75	Surface profilometry, dual Ni electrodeposited layer, pulsed current	256
Linear sweep voltammetry	130, 149	Potentiodynamic polarisation	41, 47, 100, 163, 256, 311, 317	Surface roughness, AFM, Cu electroless deposit	215
Magnesium alloy substrates, cyanide-free plating, pre-treatment	75	Pulse plating	24, 93, 158, 177, 234, 237, 243, 256, 262, 272, 277, 317	Surface roughness, Cu electrodeposit, microhole filling, AFM, PEG additive molecular weight	149
Magnesium alloy, anodic oxidation, sol gel coating, silanes, corrosion, wear tests	57	Pulsed current electrodeposition, recent advances, review	237	Taguchi statistical experimental design, Ni tertiary composite electrodeposition	93
Magnetic materials, hard, Co-Pt electrodeposition	28	Pulsed current, editorial	226		
Modelling, Ag deposit, mechanical properties, numerical simulation	209	REACH, industry concerns	124		
Modelling, eductor agitation, computational fluid dynamics	185	Review – pulsed current electrodeposition, recent advances	237		
Modelling, electrodeposited paint coating, automotive body	294	Salt spray testing	107		
Multilayer Cu/Ni/Cr plating, Mg alloy substrate, pre-treatment	75				
Nanocrystallinity	28, 47, 93, 158, 324				
Nanomaterials	8, 24, 93				
Nickel electrodeposition, lactate bath, boric acid substitute, current efficiency, crystal structure, morphology	191				

Tantala, thin anodic layers, impurity doped, analysis, GD TOFMS	154	Ultrasonics, effect on cracking, Ir electrodeposition	204	Zinc plating, pulsed current, operating maps	234
Thermal barrier coatings, electron beam PVD, partially yttria stabilised zirconia, turbine blades, cyclic test life	35	Wear resistance	21, 28, 47, 57, 158	Zinc-cobalt alloy electrodeposit, acid chloride bath, non-Cr conversion coating, phytic acid, morphology, corrosion protection	163
Throwing power, pulsed current Cu plating, through-hole	243	X-ray diffraction	28, 41, 47, 84, 100, 149, 191, 198, 215, 256, 324	Zinc-cobalt alloy multilayer electrodeposits, triangular pulse plating, acid chloride bath, thiamine hydrochloride additive, corrosion resistance	317
Transmission electron microscopy	93	X-ray photoelectron spectroscopy	28, 100, 107, 163, 277	Zinc-tin alloy plating, ionic liquids	285
Ultrasonic cleaning, cavitation intensity, aqueous alkaline solutions	166
