Volume 64
1986

MINUTES OF THE ANNUAL GENERAL MEETING

The Sixteenth Hothersall Lecture — Seeing is believing on surface treated aluminium, by D. J. Arrowsmith

Pretreatment and cathodic electropaint performance — the use of the p^+ \text{Fe}_4\text{H} ratio, by M. O. W. Richardson and D. B. Freeman

Electroforming of complex parts, by R. Suchentrunk

Influence of cathodic polarisation on the plating rate and properties of electroless Ni-P coatings, by S. J. Harris, A. J. Gould and P. J. Boden

Zinc-Cobalt alloy electrodeposition, by W. M. J. C. Verberne

Plasma and detonation gun coatings, by C. J. S. Guest

The design of rack plating systems, by M. McCormick, S. J. S. Pam and D. Howe

Recent advances in electrochemical polymerisation for surface coating, by L. E. A. Berlouis and D. J. Schiffrin

Future trends in electroplating for the electronics industry, by I. R. Christie

Selecting the right flux for the job, by Dr Wallace Rubin

The electrolytic removal of gold from spent electroplating, by F. C. Walsh and G. Wilson

Gold flashed palladium nickel for electronic contacts, by K. J. Whitlaw

Contact resistance measurements on aged tin and tin alloy coatings, by D. Cowieson, P. Moran and M. E. Warwick

Properties of electroless nickel, by S. S. Tulsian

Kinetics of electropolishing of vertical tubes, by M. A. Fawzy and G. H. Sedahmed

The influence of metallurgical features in acid etching for lithoplates, by A. J. Dowell

Chromic acid anodizing of aluminium, by D. J. Arrowsmith and D. A. Moth

Effect of mode of application on the formation of zinc alloy films on aluminium, by M. Turner and J. K. Dennis

Nickel-phosphorus electroposits, by D. A. Luke

Electrochemical measurements of the porosity of tin coatings on steel, by I. M. Notter and M. E. Warwick

EMI/RFI shielding of plastic components by sputter deposited metallic coatings, by J. J. Mason and Y. Zaka

The nature of defects in polyester powder films on zinc coated steel substrates, by S. O. Agbonlahor, N. R. Short and J. K. Dennis

Electrodeposition of tin from a sulphamate solution, by M. A. F. Samel, D. R. Gabe and D. R. Eastham

The importance of electrokinetic potential in the catalysis of electroless copper on epoxy-glass fibre laminates, by C. Lea and K. J. Whittaw

Effect of counterpart materials on the wear of electroless nickel-phosphorus coatings, by U. Ma and D. T. Gawne

Electrodeposition from aromatic solvents, by G. Geblewicz, R. J. Potter and D. J. Schiffrin

Electrode impedance and the effect of additives on the electrodeposition of silver, by J. P. G. Farr and O. A. Ashiri

Electrodeposition and properties of tin/nickel/silicon carbide composition coatings, by J. Sadowska-Mazur, M. E. Warwick and R. Walker

The role of chromium II and VI in the electrodeposition of chromium nickel alloys from trivalent chromium-amide electrolytes, by A. Watson, C. U. Chisholm and M. R. el-Sharif

Coatings for the corrosion protection of powered roof supports, by J. R. Griffiths

Impurity limits in hot water for sealing anodized aluminium, by G. M. Kliment

Pore penetration by adhesives in anodized aluminium, by D. J. Arrowsmith and D. A. Moth
